

Wolborough CE Nursery and Primary School

Geography Curriculum Statement

Our Curriculum statements are designed to be used as a supportive tool to plan teaching and learning across our school. The key skills are derived from the National Curriculum and spilt into individual year groups to support a progressive approach and mixed age classes.

The study of geography will inspire in children a curiosity and fascination about the world and its people which will remain with them for the rest of their lives. It needs to promote the children's interest and understanding of diverse places, people, resources and natural and human environments. We use an enquiry-based approach for teaching geography because we know it makes the learning focused for children. Questions are carefully selected to ensure that children are excited by their learning whilst ensuring National Curriculum coverage is achieved.

Key geographical skills such as mapwork, directional language and fieldwork are taught and revisited throughout the curriculum and links are made with other subjects to ensure the relevance of these skills is clear. The study of the wider world develops an understanding of what being part of a global community means. It encourages children to be more aware of other cultures around the world and the impact they can have as an individual.

Vocabulary

Children's command of vocabulary is fundamental to learning and progress across the curriculum. Vocabulary is developed actively, building systematically on pupil's current knowledge and deepening their understanding of etymology and morphology (word origins and structures) to increase their store of words. Simultaneously, pupils make links between known and new vocabulary, and discuss and apply shades of meaning. In this way, children expand the vocabulary choices that are available to them. It is essential to introduce technical vocabulary which define each curriculum subject. Vocabulary development is underpinned by an oracy culture and a tiered approach. High value is placed on the conscious, purposeful selection of well-chosen vocabulary and appropriate sentence structure to enrich access to learning and feed into written work across the curriculum.

KS1 Vocabulary List

Implementation

Pupils are taught the Geography curriculum through a two-year rolling programme. This ensures continuity and progression across the key stages. Geography and History are blocked and taught usually in alternately, depending on the overriding emphasis of the class topic.

Geography forms the basis of many of our Topics taught throughout the year with Topic lessons allocated two hours per week; this ensures that children achieve depth in their learning. We have identified the key knowledge and skills we want children to gain through each topic and these are carefully planned to ensure progression throughout the school.

At the beginning of each topic, children are able to convey what they know already as well as what they would like to find out. This informs the programme of study and ensures that lessons are relevant and take account of children's different starting points. Consideration is given to how greater depth will be taught, learnt and demonstrated within each lesson, as well as how learners will be supported in line with the school's commitment to inclusion.

In KS1, children begin to use maps and atlases to identify the countries of the UK as well as locating the world's seven continents and five oceans. They identify weather patterns and find hot and cold places across the world. Children will begin to compare where they live to places outside of Europe and ask and answer geographical questions.

In KS2, children extend their knowledge and understanding beyond the local area to the rest of the UK, Europe and America. They name and locate counties and cities as well as topographical features and land-use patterns. Map skills are further developed using digital technologies and four and six-figure grid references.

In addition to global Geography, we work at a local level. With the wild landscape of Dartmoor above us and beautiful beaches within 20 miles, our local area is stunning and it is important to us that children experience its beauty first-hand. Children use simple fieldwork and observational skills to recognise the physical and human features of the environment that surrounds them and learn to admire and respect it. We are building partnerships with our local community to best use their expertise and knowledge to

inform the children.

Through revisiting and consolidating skills, our lesson plans and resources help children build on prior knowledge alongside introducing new skills and challenge. Children expand their understanding of the local area, place knowledge of the world, human and physical geography, and geographical skills and fieldwork. Across both key stages, children have a range of opportunities to experience geography through practical and engaging tasks inside and outside the classroom.

Cross-curricular outcomes in Geography are planned for, with strong links between Art, English and History lessons identified. Our local area is fully utilised to achieve the desired outcomes, with extensive opportunities for learning beyond the classroom embedded in practice.

(During Lockdown, Geography was taught through blended learning but on the children's return to school, emphasis was placed on being able to access practical on-site learning and field trips- eg the Granite Tramway investigation for the whole school on Dartmoor.)

The National Curriculum

Key Stage 1 - Pupils should develop knowledge about the world, the United Kingdom and their locality. They should understand basic subject-specific vocabulary relating to human and physical geography and begin to use geographical skills, including first-hand observation, to enhance their locational awareness.

Locational Knowledge

- name and locate the world's seven continents and five oceans
- name, locate and identify characteristics of the four countries and capital cities of the United Kingdom and its surrounding seas

Place Knowledge

- understand geographical similarities and differences through studying the human and physical geography of a small area of the United Kingdom, and of a small area in a contrasting non-European country

Human and Physical Geography

- identify seasonal and daily weather patterns in the United Kingdom and the location of hot and cold areas of the world in relation to the Equator and the North and South Poles
- use basic geographical vocabulary to refer to
 - key physical features, including: beach, cliff, coast, forest, hill, mountain, sea, ocean, river, soil, valley, vegetation, season and weather
 - key human features, including: city, town, village, factory, farm, house, office, port, harbour and shop

Geographical Skills and Fieldwork

- use world maps, atlases and globes to identify the United Kingdom and its countries, as well as the countries, continents and oceans studied at this key stage
- use simple compass directions (North, South, East and West) and locational and directional language [for example, near and far; left and right], to describe the location of features and routes on a map
- use aerial photographs and plan perspectives to recognise landmarks and basic human and physical features; devise a simple map; and use and construct basic symbols in a key
- use simple fieldwork and observational skills to study the geography of their school and its grounds and the key human and physical features of its surrounding environment.

Key Stage 2:

Pupils should extend their knowledge and understanding beyond the local area to include the United Kingdom and Europe, North and South America. This will include the location and characteristics of a range of the world's most significant human and physical features. They should develop their use of geographical knowledge, understanding and skills to enhance their locational and place knowledge.

Locational Knowledge

- locate the world's countries, using maps to focus on Europe (including the location of Russia) and North and South America, concentrating on their environmental regions, key physical and human characteristics, countries, and major cities
- name and locate counties and cities of the United Kingdom, geographical regions and their identifying human and physical characteristics, key topographical features (including hills, mountains, coasts and rivers), and land-use patterns; and understand how some of these aspects have changed over time

- identify the position and significance of latitude, longitude, Equator, Northern Hemisphere, Southern Hemisphere, the Tropics of Cancer and Capricorn, Arctic and Antarctic Circle, the Prime/Greenwich Meridian and time zones (including day and night)

Place Knowledge

- understand geographical similarities and differences through the study of human and physical geography of a region of the United Kingdom, a region in a European country, and a region within North or South America

Human and Physical Geography - describe and understand key aspects of:

- physical geography, including: climate zones, biomes and vegetation belts, rivers, mountains, volcanoes and earthquakes, and the water cycle
- human geography, including: types of settlement and land use, economic activity including trade links, and the distribution of natural resources including energy, food, minerals and water geographical skills and fieldwork
- use maps, atlases, globes and digital/computer mapping to locate countries and describe features studied
- use the eight points of a compass, four and six-figure grid references, symbols and key (including the use of Ordnance Survey maps) to build their knowledge of the United Kingdom and the wider world
- use fieldwork to observe, measure, record and present the human and physical features in the local area using a range of methods, including sketch maps, plans and graphs, and digital technologies.

Progression of Key Skills

Key skills

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Locational Knowledge	Name and locate the world's seven continents and five oceans. Name, locate and identify characteristics of the four countries and capital cities of the United Kingdom and its surrounding seas.		Locate the world's countries, using maps to focus on Europe (including the location of Russia) and North and South America, concentrating on their environmental regions, key physical and human characteristics, countries, and major cities. Name and locate counties and cities of the United Kingdom, geographical regions and their identifying human and physical characteristics, key topographical features (including hills, mountains, coasts and rivers), and land-use patterns; and understand how some of these aspects have changed over time. Identify the position and significance of latitude, longitude, Equator, Northern Hemisphere, Southern Hemisphere, the Tropics of Cancer and Capricorn, Arctic and Antarctic Circle, the Prime/Greenwich Meridian and time zones (including day and night).			
	Can I name, locate and identify characteristics of the four countries and capital cities of the United Kingdom and its surrounding seas?	Can I name and locate the world's seven continents and five oceans?	Can I locate and name the countries making up the British Isles, with their capital cities? Can I suggest reasons for the location of towns and settlements in a particular place? <i>For example, next to a river, on a hill top.</i> Can I locate and name the main counties and cities in/around the South West? Can I compare two different regions in the United Kingdom (York and North Yorkshire) and discuss the geographical difference to Plymouth? Can I locate and name the main counties and cities in England? Can I compare land-use maps of the United Kingdom from the past with the present, focusing on land use and tourism impact?	Can I locate the main countries of Europe, including the location of Russia, and identify the capital cities? Can I name and locate the key topographical features including coast, features of erosion, hills, mountains and rivers and understand how these features have changed over time? Can I identify the position and significance of latitude, longitude and the Greenwich Meridian and time zones? Can I locate the main countries in Europe, North and South America and name principle cities?	Can I locate the main countries of Europe, including the location of Russia, and identify the capital cities? On a world map, Can I locate the main countries in Africa, Asia and Australasia/Oceania and identify their main environmental regions, key physical and human characteristics, and major cities? Can I map how land use has changed over time?	Can I identify the longest rivers in the world, largest deserts, and highest mountains and compare these with the United Kingdom? Can I identify the position and significance the Northern and Southern Hemisphere and the Arctic and Antarctic circles? On a world map, Can I locate areas of similar environmental regions, either desert, rainforest or temperature regions? Can I identify the position and significance of Equator and the Tropics of Cancer and Capricorn? Can I identify the position and significance of latitude, longitude and the Greenwich Meridian and time zones?
Place Knowledge	Understand geographical similarities and differences through studying the human and physical geography of a small area of the United Kingdom, and of a small area in a contrasting non-European country.		Understand geographical similarities and differences through the study of human and physical geography of a region of the United Kingdom, a region in a European country, and a region in North or South America.			
	Can I talk about and describe people and places where I live? Can I talk about similarities and differences between places? <i>For example, the school playground and the town park.</i> Can I talk about the different ways to travel, on foot, by car, train, bus? Can I understand geographical similarities and differences through studying the human and physical geography of small area of the United Kingdom?	Can I understand geographical similarities and differences through studying the human and physical geography of a small area of the United Kingdom, and a small area in a contrasting non-European country concentrating on islands and sea sides using Barnaby Bear (or similar)?	Can I compare a region in the United Kingdom with a region in Europe?	Can I understand geographical similarities and differences through the study of human and physical geography of a region of the United Kingdom? Can I compare a region in the United Kingdom with a region in North America with significant differences and similarities and understand some of the reasons for the similarities and differences? Can I compare a region in the United Kingdom with a region in North or South America with significant differences and similarities?		Can I understand geographical similarities and differences through the study of human and physical geography of a region within South America?

Human and Physical Geography	<p>Identify seasonal and daily weather patterns in the United Kingdom and the location of hot and cold areas of the world in relation to the Equator and the North and South Poles.</p> <p>Use basic geographical vocabulary to refer to:</p> <ul style="list-style-type: none"> Key physical features, including: beach, cliff, coast, forest, hill, mountain, sea, ocean, river, soil, valley, vegetation, season and weather Key human features, including: city, town, village, factory, farm, house, office, port, harbour and shop 		<p>Describe and understand key aspects of:</p> <ul style="list-style-type: none"> physical geography, including: climate zones, biomes and vegetation belts, rivers, mountains, volcanoes and earthquakes, and the water cycle human geography, including: types of settlement and land use, economic activity including trade links, and the distribution of natural resources including energy, food, minerals and water

In order to assess impact - a guide

Teachers are responsible for the regular assessment of their pupils against key skills to judge the impact of teaching and learning in Geography. Teachers look at the learning journey of each unit studied, being aware of what the children need for their next learning and what they can take from prior learning. Units will therefore begin with an elicitation task, either individual or whole class, to judge prior knowledge; a KWL (know, want to learn, learnt) grid could be used and may be completed independently in books or constructed with the teacher.

Children's progress is monitored against National Curriculum expectations and key skills. Judgement is informed through use of children's books, dialogue, class scrapbooks, evidence on Sway and Tapestry, and AFL pieces. Teachers need to be clear on how the children will show their learning, through a presentation, art work or extended writing, for example, providing opportunity for pupils to communicate their learning in a variety of ways.

There is an expectation that Geography learning in books will be the same quality as that in English books. Marking and feedback in Geography should be the same standard as marking/feedback within other learning across the curriculum, including English. The focus for spelling corrections is on Geography vocabulary and the expectation is that children working at age related expectation, will spell these correctly throughout their Geographical writing.
